

Business Benefit Report

Revenue Optimization & Sales Insights

1. Executive Summary

This report presents a comprehensive sales performance analysis using multi-level KPIs across **Category, Sub-Category, Brand, Product, Store Type, Store ID, Geography (State & City)**.

The objective is to enable **revenue growth, demand optimization, customer acquisition, and operational efficiency** through data-driven insights.

2. KPI Framework Used

The analysis is structured across multiple time dimensions to ensure both **short-term monitoring** and **long-term strategic planning**:

- **Yday** – Daily performance tracking
- **MTD (Month to Date)** – Ongoing monthly growth tracking
- **LMTD (Last Month Till Date)** – Comparative trend analysis
- **LM (Last Month)** – Historical benchmark
- **QTD (Quarter to Date)** – Mid-term performance view
- **YTD (Year to Date)** – Long-term growth evaluation

Core KPIs Analyzed:

- Orders
- GMV (Gross Merchandise Value)
- Revenue
- Customers & New Customers
- Live Products

- Live Stores
-

3. Business Benefits

A. Revenue Growth Optimization

How the analysis helps:

- Identifies **high-revenue and low-revenue categories, brands, and products**
- Compares **current performance vs past periods (MTD vs LMTD, LM)**
- Highlights **revenue leakage areas**

Business Benefit:

- Focus sales efforts on **top revenue-contributing segments**
 - Discontinue or reprice **low-performing SKUs**
 - Improve overall **revenue realization**
-

B. Demand & Sales Trend Identification

How the analysis helps:

- Tracks order and GMV trends across **daily, monthly, quarterly, yearly views**
- Detects **seasonal and cyclical patterns**
- Identifies early signs of **growth or decline**

Business Benefit:

- Better **sales forecasting**

- Proactive inventory and promotion planning
 - Reduced last-minute operational surprises
-

C. Product Portfolio Optimization

How the analysis helps:

- Measures performance by **Product ID, Brand, Sub-Category**
- Compares live products vs revenue contribution
- Detects **high SKUs with low visibility** and vice-versa

Business Benefit:

- Optimize product assortment
 - Promote **high-margin, high-conversion products**
 - Reduce operational cost by trimming poor performers
-

D. Customer Acquisition & Retention Insights

How the analysis helps:

- Tracks **new customers vs repeat customers**
- Identifies acquisition trends by **category, brand, store, region**
- Compares customer growth across time frames

Business Benefit:

- Improve **customer acquisition strategies**
- Target retention campaigns for high-value customers

- Increase **customer lifetime value (CLV)**
-

E. Store & Channel Performance Improvement

How the analysis helps:

- Compares performance across **Store Type and Store ID**
- Evaluates store productivity using orders, GMV, revenue
- Tracks live stores vs contribution

Business Benefit:

- Identify **high-performing and underperforming stores**
 - Optimize store expansion and closure decisions
 - Improve **store-level sales accountability**
-

F. Geographic Sales Optimization

How the analysis helps:

- Performance mapping by **State and City**
- Identifies **high-potential and low-penetration markets**
- Detects regional demand patterns

Business Benefit:

- Region-specific sales and marketing strategies
- Efficient allocation of sales resources
- Stronger regional revenue contribution

G. Inventory & Supply Chain Efficiency

How the analysis helps:

- Correlates live products with demand and revenue
- Identifies overstocked vs understocked segments
- Supports demand-based supply planning

Business Benefit:

- Reduced inventory holding costs
- Faster inventory turnover
- Improved fulfillment efficiency

H. Leadership & Decision-Making Enablement

How the analysis helps:

- Single-view performance dashboard across all dimensions
- Time-based KPI comparison supports quick decisions
- Clear performance visibility for management

Business Benefit:

- Faster, data-backed executive decisions
 - Reduced dependency on manual reports
 - Improved cross-team alignment (Sales, Ops, Marketing)
-

4. Strategic Recommendations

- Prioritize **high-revenue & high-growth categories**
 - Scale operations in **top-performing states and cities**
 - Increase focus on **brands and products with strong MTD & YTD trends**
 - Strengthen **new customer acquisition channels**
 - Optimize store network based on performance metrics
-

5. Conclusion

This capstone analysis provides a **360-degree sales performance view**, enabling leadership to:

- Maximize revenue
- Improve operational efficiency
- Enhance customer acquisition and retention
- Drive sustainable business growth

The insights generated can directly support **strategic planning, sales forecasting, and performance optimization** at both tactical and leadership levels.
